

INSWAN + Insig for remotely therapy sessions (if you also have a computer camera)

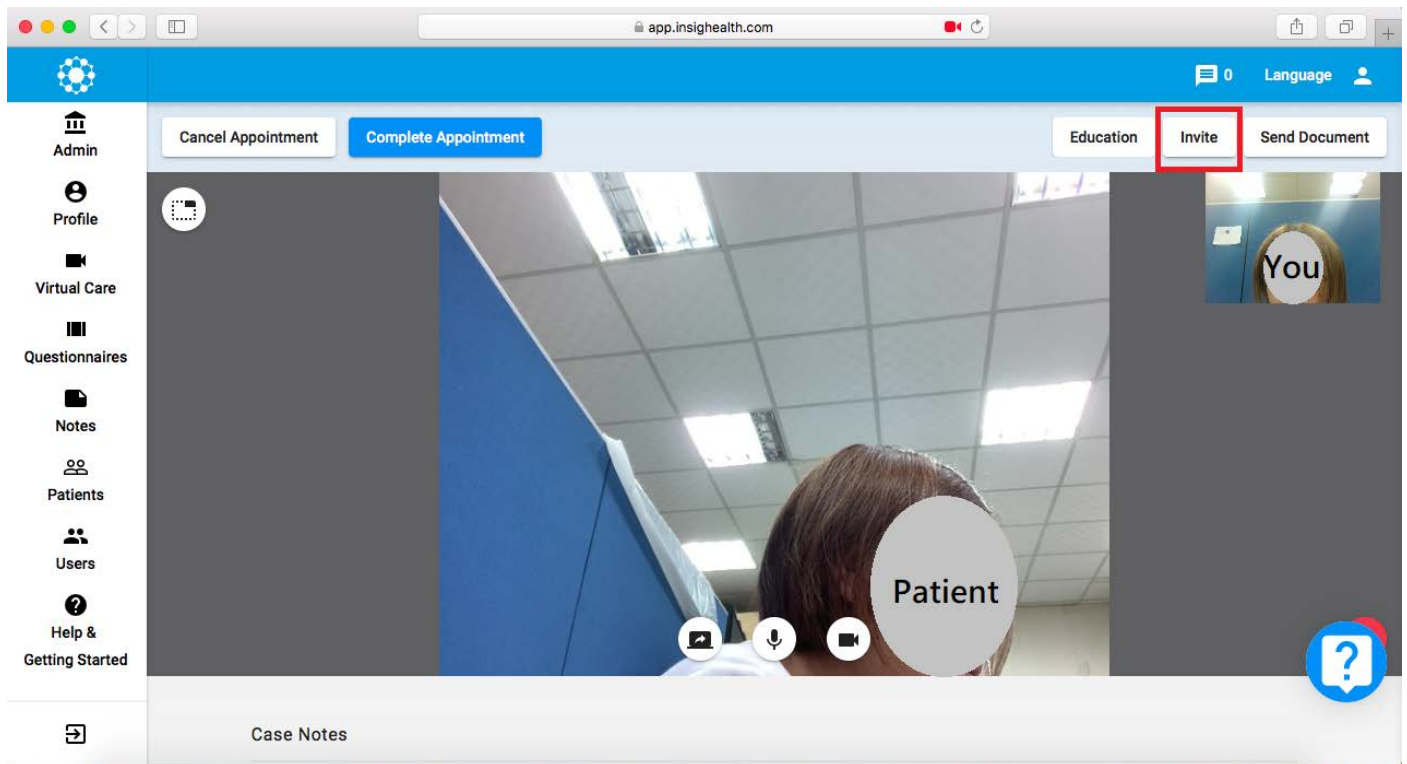

1. Open **Insig**, click on **Virtual Care**, select your appointment, and then click on **Open Visit**.

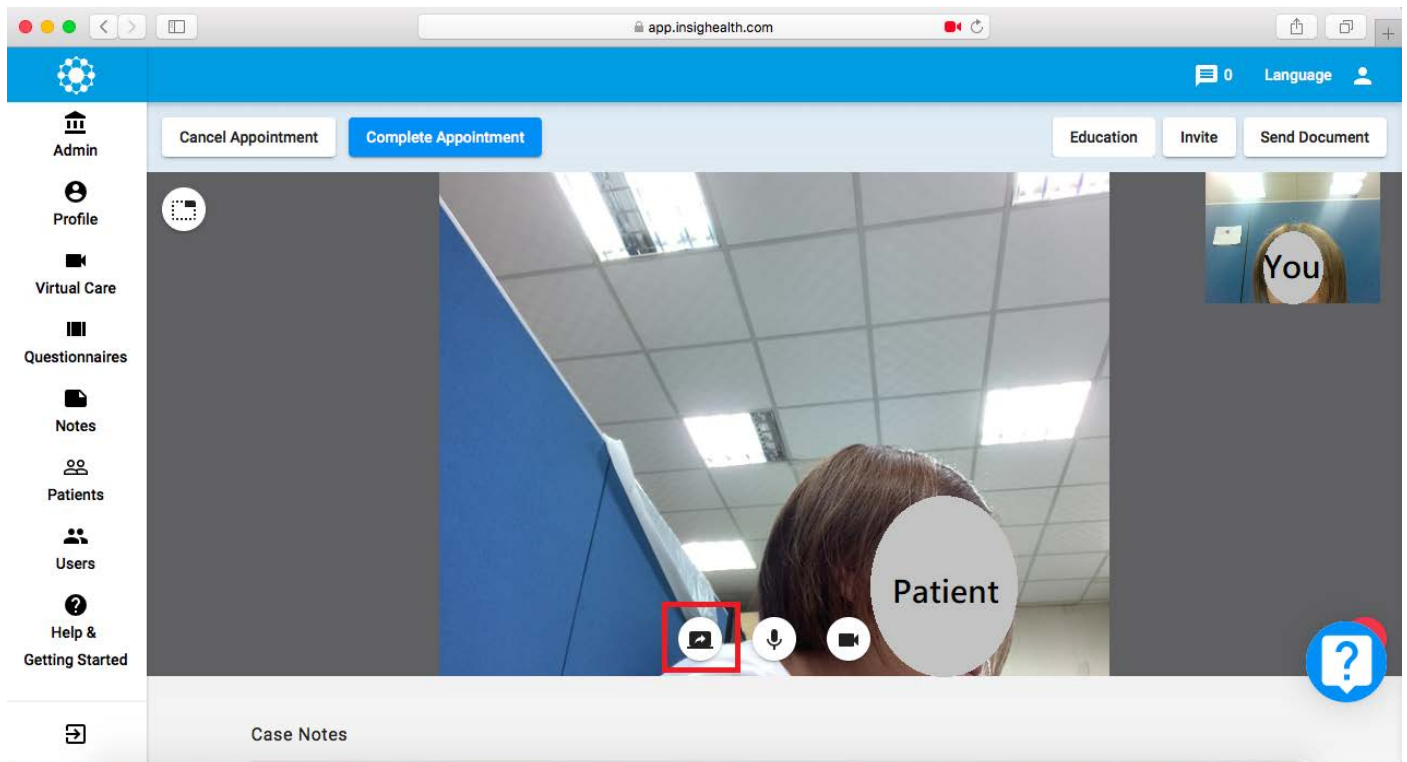

2. Select **Allow** when the message box pop-up. The **Insig** will set your computer camera and microphone as a default image device.

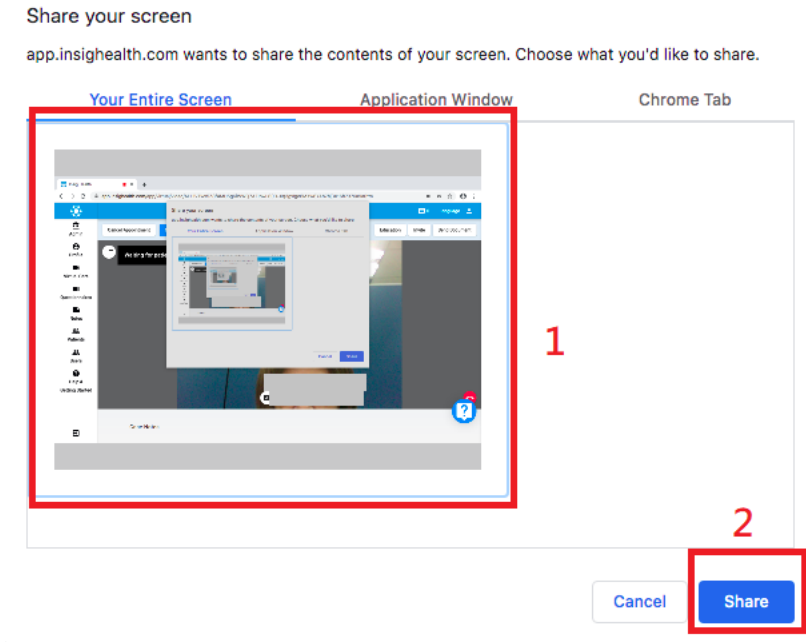

3. Click the **Invite** button to invite your patient. Your session will automatically begin when your patient join in.

4. Click on the **share screen** button.

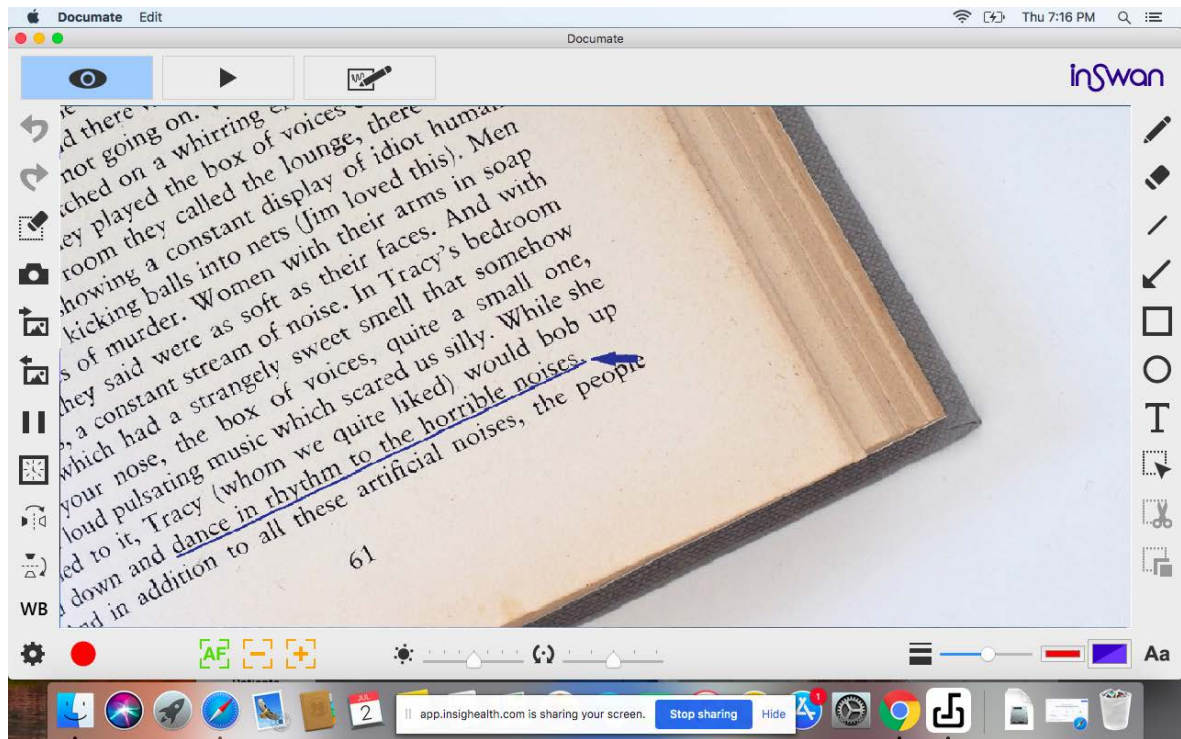

5. Select your screen and click on **Share**.

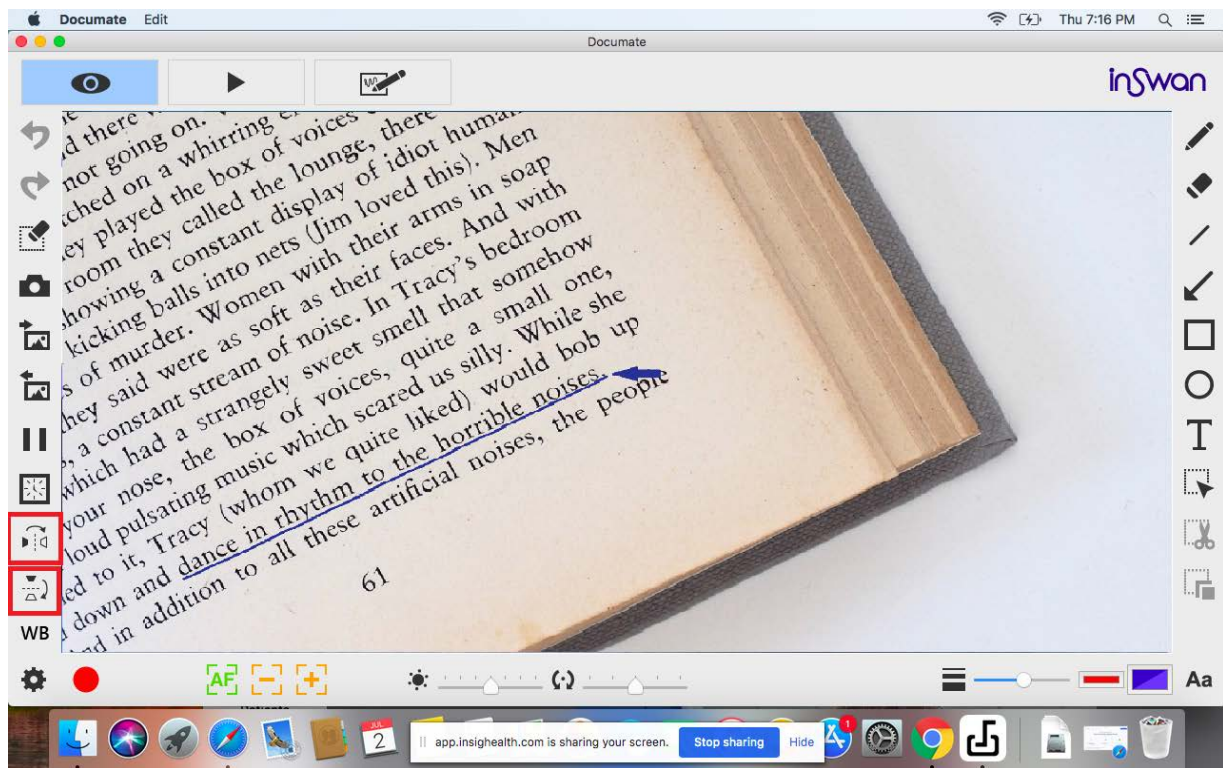

6. Connect your INSWAN document camera to your computer via the USB cable.

7. Open your **Documate** () application. Once **Documate** is opened, your screen should look something like this:

8. Use these two buttons to change the orientation of the image.

9. If you want to capture your face, direct the head of your INSWAN document camera towards the speaker's face.

10. If your image is upside down, change the image orientation by simultaneously pressing both the brightness(+) and the brightness(-) buttons.

11. Then your screen should look something like this:
